

Niyanta Bhayani

Associate Technical Lead - Backend Development Expert - Women Techmakers Ambassador

☎ +91 8238126100 ✉ niyapatel988@gmail.com 🔗 [linkedin.com/in/niyanta-bhayani-379961167](https://www.linkedin.com/in/niyanta-bhayani-379961167)

Professional Summary

Results-driven Senior Software Engineer with 7+ years of progressive experience in backend development, web technologies, and cloud computing. Demonstrated expertise in architecting and delivering scalable enterprise applications using PHP, Laravel, Node.js, and AWS. Proven track record of leading cross-functional development teams, mentoring junior engineers, and implementing best practices that drive technical excellence. Women Techmakers Ambassador passionate about fostering diversity in technology and empowering developers to reach their full potential. Strong background in solutions architecture, payment system integrations, API optimization, and cloud infrastructure management across e-commerce, education, and HRM domains. Combines deep technical knowledge with strategic thinking and exceptional communication skills to bridge the gap between business objectives and technical implementation.

Core Competencies

Backend Technologies: PHP, Laravel, Lumen, Symfony, Node.js, Express.js, CodeIgniter, Python

Frontend Technologies: JavaScript, HTML5, CSS3, jQuery, Bootstrap, Vue.js, React.js

Database Management: MySQL, MongoDB, Database Design, Redis, Elasticsearch, Query Optimization

Cloud & DevOps: Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Firebase, Cloud Architecture

Development Tools: Git, GitHub, Agile/Scrum Methodologies, CI/CD Pipelines

Integration & APIs: Payment Gateway Integration, Google APIs, Third-party API Integration, Microservices

Domain Experience: ERP, CRM, HRM, E-commerce, Education, Health & Fitness, Admin Panels, Business Websites

Leadership Skills: Technical Mentorship, Code Review, Team Leadership, Project Management, Client Communication

Languages: Gujarati, Hindi, English

Professional Experience

Associate Technical Lead (Remote)

April 2025 – February 2026

Squareboat, Gurugram, Haryana, India

- Spearhead technical leadership initiatives across multiple high-priority projects, establishing architectural standards and ensuring successful delivery aligned with business goals and timeline commitments
- Drive strategic decision-making for technology stack selection, infrastructure design, and development methodologies resulting in improved scalability and maintainability of applications
- Lead and mentor cross-functional teams of frontend and backend developers, conducting comprehensive code reviews, architectural discussions, and technical training sessions to elevate team capabilities
- Collaborate extensively with project managers, product owners, and stakeholders to translate complex business requirements into robust technical specifications and actionable development roadmaps
- Optimize server infrastructure and application deployment processes using AWS, Docker, and Firebase, achieving enhanced performance metrics and operational efficiency
- Establish and enforce coding standards, best practices, and quality assurance processes that have significantly reduced technical debt and improved code maintainability

Senior Software Engineer (Remote)
Squareboat, Gurugram, Haryana, India

June 2023 – April 2025

- Architected and developed sophisticated backend solutions leveraging PHP, Laravel, and MySQL for enterprise-level applications serving thousands of concurrent users with high availability requirements
- Managed comprehensive end-to-end server infrastructure deployment, configuration, and maintenance on AWS cloud platform, consistently achieving 99% uptime and optimal performance benchmarks
- Implemented robust security measures, performance optimization techniques, and monitoring solutions to ensure application reliability and data protection compliance
- Provided structured technical mentorship to junior developers through regular one-on-one sessions, code review workshops, pair programming initiatives, and knowledge transfer documentation
- Designed and implemented efficient Git workflows, branching strategies, and version control best practices resulting in 30% reduction in merge conflicts and improved team collaboration
- Led technical discussions and contributed to architectural decisions for new features and system enhancements, balancing innovation with maintainability

Technical Specialist – Full Stack Development
Tata STRIVE, Navsari, Gujarat, India

January 2023 – May 2023

- Designed, developed, and delivered comprehensive Full Stack development curriculum covering modern web technologies including HTML5, CSS3, JavaScript, Bootstrap, ReactJS, MongoDB, and Node.js
- Successfully mentored and trained 50+ students through immersive hands-on training sessions, real-world project implementations, and personalized career guidance resulting in 85% job placement rate
- Conducted mock technical interviews, resume reviews, and soft skills training to prepare students for competitive job market and professional workplace environments
- Led capstone project development in e-commerce, education technology, and business application domains, guiding students through complete software development lifecycle from requirements to deployment
- Created practical learning modules addressing real-life technical challenges and industry scenarios, significantly improving student confidence and technical competency
- Fostered collaborative and inclusive learning environment while motivating colleagues and contributing to curriculum enhancement initiatives

Senior Software Engineer
Narola Infotech, Surat, Gujarat, India

March 2022 – December 2022

- Led development teams in architecting and implementing highly scalable, production-ready applications using Node.js, Express.js, and MongoDB for diverse enterprise clients across multiple industry verticals
- Designed and delivered professional networking platform with LinkedIn-style architecture featuring user profile management, content sharing, real-time messaging, connection recommendations, and advanced search capabilities
- Optimized API performance and database queries for educational study platforms, achieving 40% improvement in response times and 50% reduction in server load through caching strategies and query optimization
- Developed comprehensive Human Resource Management systems with modules for employee management, attendance tracking, leave management, payroll processing, and performance evaluation
- Implemented education domain solutions including learning management systems, student portals, and content delivery platforms serving educational institutions

- Established rigorous code quality standards through systematic code reviews, automated testing implementation, and technical documentation practices ensuring maintainable and bug-free deliverables

Software Engineer

March 2021 – February 2022

Narola Infotech, Surat, Gujarat, India

- Developed and maintained complex web applications utilizing Laravel framework, CodeIgniter, HTML5, CSS3, jQuery, and JavaScript to meet diverse client requirements across various business domains
- Successfully integrated multiple third-party services including payment gateways (Stripe, PayPal, Razorpay), Google APIs (Maps, Analytics, Authentication), AWS services (S3, EC2, Lambda), and Firebase (Authentication, Realtime Database, Cloud Messaging)
- Collaborated effectively with cross-functional teams including designers, QA engineers, and project managers to deliver high-quality solutions within aggressive timelines while maintaining excellent client communication
- Implemented comprehensive error handling, logging mechanisms, and monitoring solutions to ensure application stability and facilitate rapid troubleshooting
- Utilized Git version control system for efficient code management, branch management, and seamless team collaboration across multiple concurrent projects
- Contributed to technical documentation, API documentation, and knowledge base creation to support team onboarding and project continuity

Assistant Developer

February 2019 – February 2021

IBL INFOTECH, Surat, Gujarat, India

- Led and coordinated team of 4 developers, managing task allocation, progress tracking, and quality assurance to ensure consistent on-time project delivery and client satisfaction
- Managed end-to-end client communications including requirement gathering sessions, technical consultations, progress updates, and product demonstrations throughout the development lifecycle
- Conducted comprehensive product testing including functional testing, integration testing, and user acceptance testing to identify and resolve issues before production deployment
- Designed and developed RESTful APIs with proper authentication, authorization, and documentation to support mobile applications and third-party integrations
- Built custom web applications and content management systems tailored to specific client business needs using modern web development frameworks and technologies

Software Development Intern

August 2018 – January 2019

Knovator, Surat, Gujarat, India

- Gained foundational hands-on experience in web development technologies, software engineering principles, and industry best practices through structured mentorship and project work
- Contributed to live client projects under senior developer supervision, learning practical implementation of theoretical concepts and professional coding standards

Education

Bachelor of Engineering in Information Technology

Gujarat Technological University (GTU)

Graduated with Distinction - Strong foundation in Data Structures, Algorithms, Database Management, and Software Engineering

Honors, Awards & Recognition

- **Women Techmakers Ambassador** – Recognized for contributions to diversity in technology and community leadership
- **Excellent Performer of the Year (Multiple Years)** – Awarded for outstanding technical contributions and project delivery
- **Volleyball Player** – Demonstrated teamwork, leadership, and competitive excellence in sports

Professional Development & Community Involvement

- Actively organize and lead technical workshops, mentoring sessions, and learning initiatives at workplaces and educational institutions
- Passionate about empowering individuals to step outside their comfort zones and demonstrate their true potential in technology careers
- Regular contributor to knowledge sharing sessions on Software Engineering, Web Technologies, and Cloud Computing best practices
- Advocate for personal development, strategic partnerships, and collaborative problem-solving in technology teams
