Niyanta Bhayani

Associate Technical Lead | Senior PHP & Laravel Engineer |
Backend Systems | AWS | Remote-Ready | Women Techmakers
Ambassador

Surat, Gujarat, India

Summary

Hello, I'm Niyanta Bhayani, an Associate Technical Lead and backend-focused full-stack engineer with 6+ years of experience building, stabilizing, and scaling production-grade web applications.

My primary strength lies in backend engineering—designing robust APIs, optimizing databases, and ensuring system reliability using PHP, Laravel, Core PHP, MySQL, Redis, and AWS. Alongside this, I have solid full-stack experience, collaborating closely with frontend teams and delivering end-to-end features where required.

I have hands-on experience modernizing legacy PHP systems, improving application performance, reducing downtime, and implementing clean, maintainable architectures. I regularly work with Docker, CI/CD pipelines, and cloud infrastructure, taking ownership of systems from development through production.

As an Associate Technical Lead, I contribute both as an individual engineer and as a technical mentor—reviewing code, guiding architectural decisions, and supporting team growth. I am comfortable working in remote, asynchronous environments and owning backend systems end-to-end.

Beyond my core engineering work, I am passionate about mentorship and community building. As a Women Techmakers Ambassador, I actively support learning and development initiatives for engineers.

Core Expertise:

Backend Development, Full-Stack Engineering, PHP 8+, Laravel, Core PHP, REST APIs, MySQL, Redis, Docker, AWS, CI/CD, System Optimization

Open to remote backend-first full-stack opportunities where system quality, ownership, and scalability matter.

Experience

Squareboat

2 years 9 months

Associate Technical Lead

April 2025 - February 2026 (11 months)

Gurugram

Work as a full-stack engineer, delivering end-to-end web solutions including Website, Dashboards and ERP systems for production environments.

Own and maintain legacy PHP systems, ensuring stability, backward compatibility, and incremental modernization without disrupting live business workflows.

Design, develop, and maintain scalable backend systems and REST APIs using PHP, Laravel, and MySQL, with strong focus on performance optimization, security, and scalability.

Build and enhance web interfaces and admin panels using HTML, CSS, Bootstrap, and server-rendered Laravel views, supporting internal operations and customer-facing workflows.

Developed frontend components for a chatbot integrated with Dialogflow CX, enabling seamless interaction between conversational flows and backend services via custom APIs.

Integrate third-party services and internal systems through well-structured APIs, supporting CRM, ERP, and automation use cases.

Lead code reviews, enforce clean architecture and coding standards, and mentor engineers across backend and full-stack development.

Collaborate closely with product managers, designers, and stakeholders to translate business requirements into reliable, end-to-end technical solutions.

Manage deployments and ensure production stability in AWS-based environments, including monitoring, debugging, and resolving live issues.

Actively contribute to improving development workflows, documentation, and long-term maintainability of complex systems.

Skills:

Backend Development · Full-Stack Web Development · PHP · Laravel · MySQL · REST APIs · Legacy System Modernization · ERP & CRM Systems · HTML · CSS · Bootstrap · AWS · Technical Leadership

Sr. Software Engineer at Squareboat | Enhancing Web Development and Cloud Solutions

June 2023 - April 2025 (1 year 11 months)

Gurugram, Haryana, India

Lead and oversee various projects, ensuring timely and successful delivery. Guide and mentor frontend developers, providing technical support and reviewing design implementations.

Primarily focus on backend development, utilizing PHP, Laravel, and MySQL. Manage server infrastructure and maintain applications using AWS, Docker, and Firebase.

Collaborate closely with project managers to align development efforts with business goals.

Review code and provide feedback to junior developers, fostering a collaborative and learning-driven environment.

Utilize Git for version control, ensuring efficient and organized project workflows.

Tata STRIVE

Technical Specialist

January 2023 - May 2023 (5 months)

Navsari, Gujarat, India

As a Technical Specialist for the Full Stack course at Tata STRIVE, I mentored students and provided guidance. I taught classes, shared practical knowledge, and tackled real-life problems in tech. I helped students build confidence, conducted mock interviews, and prepared them for jobs. We built projects in e-commerce and other domains as final submissions. I worked with HTML/CSS, JavaScript, Bootstrap, ReactJS, MongoDB, and Node.js. I also supported my team and motivated my colleagues.

Narola Infotech

1 year 11 months

Software Engineer

March 2021 - January 2023 (1 year 11 months)

Surat, Gujarat, India

Working as a Software Engineer at Narola Infotech, I have over 2 years of experience in Laravel, HTML, CSS, jQuery, and JavaScript, with some knowledge of CodeIgniter. I have worked with different teams and have experience in payment integration, Google API, AWS, and Firebase. I am proficient with version control systems like Git and have strong communication skills.

Senior Software Engineer

March 2022 - December 2022 (10 months)

Surat, Gujarat, India

As a Senior Software Engineer, I lead projects, guide junior developers, and enhance my skills in Node.js, Express, and MongoDB. My roles and responsibilities include designing and implementing scalable applications, ensuring code quality through reviews, and optimizing performance. I have worked on several projects, including platforms similar to LinkedIn, API optimization for study platforms, HRM systems, and projects related to the education domain.

IBL INFOTECH

Assistant Developer

February 2019 - February 2021 (2 years 1 month)

Surat, Gujarat, India

As Assistant Developer my job was to work with the team to build applications and web for clients. I

lead a group of 4 developers for the timely delivery of the project.

Project Lead,

Client Communication and requirement gathering,

Testing the product.

I am creating REST API and websites for clients.

Knovator

Intern

August 2018 - January 2019 (6 months)

Surat Area, India

Education

Gujarat Technological University (GTU)

BE - Bachelor of Engineering, Information Technology
